

# RGB Pastelky

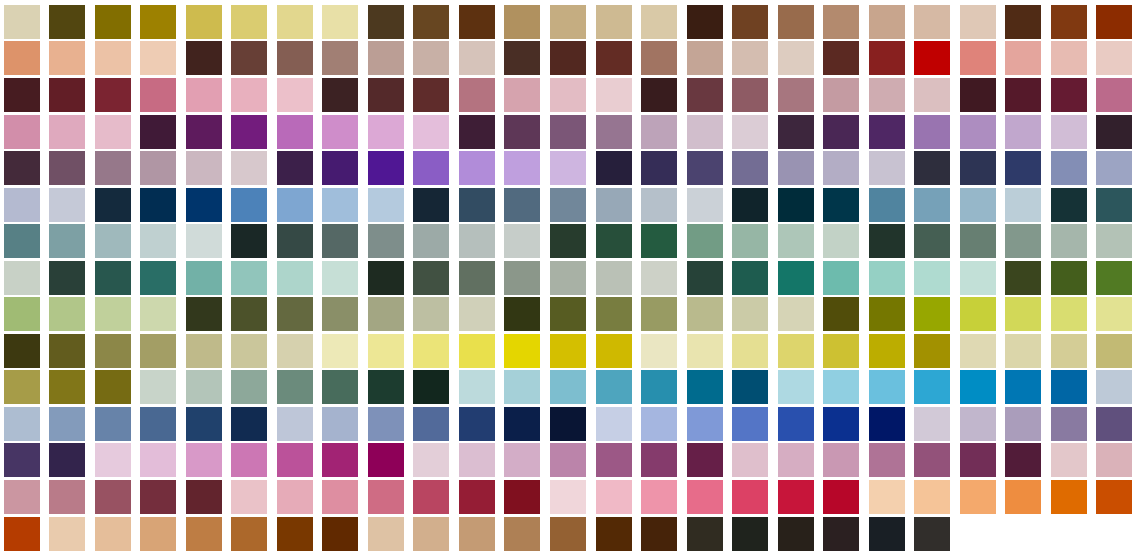

Vojta Hanák

RGB hodnoty některých barev pro balík `color` a jejich definice do preamble. Balík se volá příkazem `\usepackage{color}`, změna barvy textu příkazem `\textcolor{definovaná barva}{text}` pro nedefinovanou barvu příkazem `\textcolor[RGB]{hodnoty}{text}`. Vytvoření barevného boxu se provádí příkazem `\colorbox` se stejnými parametry. Pro box s rámečkem se použije příkaz `\fcolorbox{barva rámu}{barva pozadí}`.

## Obsah barev
